

Courses Description

College: Nursing

Department: A

Course ID: 702132 **Description:** Fundamentals Of Nursing/Clinical

Full Course Description: Developing the students' basic nursing skills at the faculty of nursing labs is an essential component of this course. These skills are considered basics to actual nursing practice, which would enable individuals to attain optimum health. In addition, this course aims at developing student's ability in applying the nursing care process in the laboratories; this is considered as an essential step in preparing the students for real practical settings as hospitals and health care centers.

Course ID: 702216 **Description:** Health Assessment/Clinical

Full Course Description: Practical applications of comprehensive health assessment skills, including the physical, psychological, social, and functional health aspects are basic components of this course. The process of data collection, interpretation, documentation, and dissemination of assessment data are addressed throughout the course.

Course ID: 702243 **Description:** Adult Health Nursing(1) /Clinical

Full Course Description: Practical applications of theoretical information through the use of the nursing process in assessing, diagnosing, planning, and providing high quality nursing care for adult patients in acute and chronic care settings are essentials of this course. Basic needs and appropriate nursing care for older adults are emphasized. This course will provide the students with opportunity to interact, communicate, and provide nursing care to highly-diversified and carefully-selected clients with different diagnosis.

Course ID: 702244 **Description:** Adult Health Nursing(2)/Clinical

Full Course Description: Applications of the theoretical information through the use of nursing process, critical thinking and problem solving skills in providing nursing care of adult patients who are experiencing cardiovascular, pulmonary, neurological, sensor-neural and integumentary problems that require critical care.

Course ID: 702421 **Description:** Clinical Practicum & Professional Adaptation

Full Course Description: This course deals with independent and comprehensive clinical training in various practical training settings, especially hospitals, with the aim of developing the cognitive structure□ Students have different nursing skills, which contributes to their numbers as competent nurses after graduation.

Course ID: 702422 **Description:** Critical Care Nursing

Full Course Description: This course focus on the integration of knowledge and skills to provide effective and efficient nursing care to critically ill adults, infants and children as well as family and community. In this course, nursing process and nursing theories will be applied to clients (persons, families, groups, and communities) experiencing acute and complex care needs, which may be life-threatening

Course ID: 702452 **Description:** Nursing Leadership And Management/Clinical

Full Course Description: Emphases of this course are placed on applying various concepts, theories, and models of leadership and management. This course aims at providing the students with knowledge and skills needed to help the students to act as leaders and managers after graduation

Course ID: 1702131 **Description:** Fundamentals of Nursing/Theory

Full Course Description: Basic understanding of certain key concepts and principles fundamental to the practice of nursing are major milestones in this course. Historical influences on nursing practice as well as legal and ethical implications for nursing are included. Emphasis on the wellness- illness continuum. The student is introduced to the nursing process as a systematic method of problem solving in which effective communication and interpersonal relationships are central components. Knowledge about human basic needs is provided to meet the needs of the patient. Instructions throughout the course focus on the development of critical thinking skills necessary for the delivery of nursing care

This course also aims to introduce students to the main principles of first aid necessary to deal with various emergency cases such as: resuscitation, trauma, wounds and bleeding, fractures, burns, shock and fainting, using problem-solving methods and creative thinking.

Course ID: 701315 **Description:** Health Promotion and Disease Prevention

Full Course Description: Basic concepts of health from infancy to adulthood up to aging, how the health can be promoted, and preserving the suitable health level are basic components of this course. This course includes developing, practicing and evaluating a holistic health program. Another focus of this course is the application of the general safety measures of the surrounded environment of individuals, families, or/and communities.

Course ID: 701316 **Description:** Biostatistics

Full Course Description: Providing students with foundations to evaluate information and skills critically to support scientific research course. The course emphasizes on statistical concepts, statistical and analytical methods used in health-related sciences such as nursing. Topics include the basic concepts of descriptive and inferential statistics, probability distribution, hypothesis testing, univariate and bivariate analyses which include correlation and regression models. Parametric and nonparametric tests are major milestones in this course.

Course ID: 701404 **Description:** Mental Health Nursing /Clinical

Full Course Description: The clinical part includes using and applying steps of nursing process as a general framework to get benefit of the course content, and clarify ways of dealing with clients who complain of psychological, mental, emotional, spiritual, or/and sociological problems that have mental or psychological effects. Students are trained in health care institutions or community settings.

Courses Description

College: Nursing

Department: Community And Mental Health Nursing

Course ID: 701412 **Description:** Community Health Nursing/Clinical

Full Course Description: The clinical experience includes home visits, health education for clients, families according to the accurate scientific methods provided within a variety of settings with focus on the way of dealing and communicating with the elderly and providing care in the elderly settings.

Course ID: 701421 **Description:** Clinical Practicum&Professional Adaptation

Full Course Description: This course is considered comprehensive and intensive training for nursing students, during which students are trained on a large number of cases and training settings to serve the development of their clinical skills.

Course ID: 701451 **Description:** Nursing Leadership and Management / Theory

Full Course Description: This course aims to introduce students to the concepts of management, their theories and applications in relation to the nursing specialty and includes: Definition of the administrative process and its steps. □

Course ID: 701452 **Description:** Nursing Leadership and Management / Clinical

Full Course Description: This course aims to introduce students to the concepts of management, their theories and applications in relation to the nursing specialty and includes: Definition of the administrative process and its steps. □
including the application

Course ID: 2701207 **Description:** Communication Skills

Full Course Description: General principles, concepts, and skills related to communication are provided to the nursing students to: communicate effectively with clients, families, colleagues, health team members, and others in their daily life; understand the human behaviors; and help individuals to adapt with their surrounding environment for the purpose of achieving the optimal level of health. It focuses on stimulating students to develop effective intrapersonal and interpersonal communication skills, and assist them to move from merely understanding of communication principles to their applications in life effectively.

Course ID: 2701315 **Description:** Health Promotion & Disease Prevention

Full Course Description: Basic concepts of health from infancy to adulthood up to aging, how the health can be promoted, and preserving the suitable health level are basic components of this course. This course includes developing, practicing and evaluating a holistic health program. Another focus of this course is the application of the general safety measures of the surrounded environment of individuals, families, or/and communities.

Course ID: 2701403 **Description:** Mental Health Nursing /Theory

Full Course Description: The concepts of mental health, illness, and the cultural attitudes towards mental health patient are addressed. Special emphases are placed on the development of interpersonal skills, communication skills, and group processes. The course is based on a holistic and humanistic framework, emphasizing critical thinking, caring, and therapeutic nursing interventions. Nursing process forms the foundation of decision-making and encompasses all significant actions taken by nurses in providing relevant mental health care to all clients.

Course ID: 2701411 **Description:** Community Health Nursing/Theory

Full Course Description: The concepts of community health, types of communities, assessment manners, planning to protect community health, primary health care principles and means of delivering care to individuals, families, and groups are explored. The roles of the community health nurse are viewed from a multifaceted, dynamic, and interactive perspective within the limits of a changing environment. In addition, this course explores the role of the primary health in Jordan in promoting community health, in particular in rural areas.
